## Short Bio

Teamwork, Dedication, Consideration, Encouragement, Simplicity. These are my core traits that help me to perform

I have worked for several clients with projects based on personal improvement, demographic data visualization and 3rd party integration.

For an application to launch it takes much commitment. I respect the workflow, looking to grow in the skills and patterns of latest trends in tech

## Projects

### Facebook Mock Project

Created a Simple Mock Version of Facebook, with latest design UI/UX concepts

**URL:**[https://michaelodumosu57.github.io/Facebook\\_Project](https://michaelodumosu57.github.io/Facebook_Project)

### Receipt Tracker

Uses webRTC and the Nanonets ML API to make an app that keeps records, and extracts price info from your receipts

**URL:**<https://gx8pv.csb.app>

### Social Uploader

Leverages modern auth to help content pro post once and see their work on all platforms
